

FreelanceFlow

A Modern SaaS Platform for Freelancers

FreelanceFlow is a full-stack SaaS application designed to simplify freelance business management by bringing **client management, project tracking, task management, time tracking, invoice generation, and business analytics** into a single platform.

Instead of switching between spreadsheets, task managers, and invoicing tools, freelancers can efficiently manage their entire workflow from one dashboard.

Features

Authentication

- User Registration
 - Secure Login
 - JWT Authentication
 - Protected Routes
 - Password Encryption
-

Client Management

- Add Client
 - Update Client
 - Delete Client
 - Contact Information
 - Default Hourly Rate
-

Project Management

- Create Projects
- Assign Client
- Budget Tracking
- Project Status

- Active / Completed Projects
-

✓ Task Management

- Create Tasks
 - Due Dates
 - Status Management
 - Project-wise Tasks
-

Time Tracking

- Persistent Stopwatch
 - Manual Time Entry
 - Time Logs
 - Billable Hours
 - Project-wise Tracking
-

Invoice Generator

- Generate Professional Invoices
 - Automatic Cost Calculation
 - PDF Invoice Generation
 - Mark Time Logs as Billed
-

Dashboard

- Active Projects

- Pending Invoices
 - Revenue Overview
 - Burn Rate
 - Recent Activity
 - Upcoming Deadlines
-

Security

- JWT Authentication
 - Multi-Tenant Data Isolation
 - User-Specific Data Access
 - Protected REST APIs
-

Tech Stack

Frontend

- React.js
 - Tailwind CSS
 - Axios
 - React Router
-

Backend

- Node.js
- Express.js

- Prisma ORM
-

Database

- PostgreSQL
 - Neon Database
-

Authentication

- JWT
 - bcryptjs
-

PDF Generation

- PDFKit
-

Deployment

- Vercel
 - Render
-

Budget - Amount Spent

🔑 Multi-Tenancy

Every database query is scoped using the authenticated user's ID.

This ensures:

- Users can only access their own data.
 - Projects, clients, tasks, invoices, and time logs remain isolated.
 - Secure multi-tenant architecture.
-

Future Enhancements

- Stripe Payment Integration
 - Email Invoice Delivery
 - Calendar Integration
 - Team Collaboration
 - Mobile Application
 - Expense Tracking
 - AI Productivity Insights
 - Multi-Currency Support
-

Local Installation

Clone Repository

```
git clone https://github.com/YOUR_USERNAME/freelanceflow.
```

```
cd freelanceflow
```

Backend

```
cd apps/server  
  
npm install  
  
npx prisma generate  
  
npx prisma migrate deploy  
  
npm run dev
```

Frontend

```
cd apps/web  
  
npm install  
  
npm run dev
```

Environment Variables

Backend

```
DATABASE_URL=your_database_url  
  
JWT_SECRET=your_secret_key  
  
PORT=5000
```
